Can You Still Get Millwork Without Priority?

The Answer Is Definitely YES!

Thousands of Millwork items can be had for repairs and essential replacements. A few items require a priority, but all-in-all you can get most of the items necessary for a first-class job.

Many articles are not being manufactured at present, but owing to the exceptionally large stocks we had on hand at the start of the emergency, we can offer you first line merchandise at little or no increase in price.

Conditions are rapidly changing in the Millwork industry, items that were scarce last month, may be had next month. If anyone can get them for you, we can. Write us on all your needs, we know we can help you solve your millwork problems.

We have cut the size of our catalog in keeping with government wishes, but we have not curtailed the same prompt, courteous service which you enjoyed in the past.

All Prices Are F.O.B. Factory or Mill

Freight rates are the same to all. Remember, no matter whom you buy from, the goods have to be shipped in and you do pay the freight—either directly or added to your purchase price. However, if you are in doubt about the amount of freight charges on your order, send us your list of items and we will gladly tell you exactly what the railroads or trucking companies will charge you.

Conditions of Sale

All merchandise in this catalog was available when this catalog was issued, however, all items are quoted subject to our ability to furnish at the time order is received by us, as the present emergency may make it impossible to secure some items after our present stock is exhausted.

All prices in this catalog subject to change when market conditions make it necessary.

The enclosed Order-Estimate Blank and Return Envelope (requiring no postage) is furnished for your convenience. Additional supplies will be sent upon request.

Terms

Deduct 2% when check accompanies order, otherwise we require a 20% Deposit with the order, balance net cash upon arrival (no discount). If order includes special manufactured millwork or amounts to less than \$25.00, please send check with order.

On Large Orders to receive 2% discount, you need only to remit for those items you wish shipped immediately, the balance can be paid for later as ordered out OR we will extend to you terms of 30 days NET from date of each invoice if you are satisfactorily rated in Dun & Bradstreets, Inc., or if your order is accompanied by a letter from your Banker or other suitable references.

To receive prompt attention, please address all orders, letters and inquiries to:—

Consolidated Sash & Door Co.

ASPHALT COATED INSULATING SHEATHING

Asphalt Coated on All Sides and Edges
Moisture Proof — 25/32" Thick — Waterproof

The perfect Wood-Fibre Sheathing Board full 25/32" thick. The Asphalt Coating prevents moisture penetration and condensation and the tiny air cells imprisoned in this insulating sheathing gives it amazing resistance to the passage of heat and cold. The asphalt coating does not fill these air cells, the surface only being covered.

Is easily handled, eliminates waste, and will help a great deal toward reducing your labor costs.

INSULATING TILE AND PLANK

Tongued and Grooved — 1/2" Thick — Moulded Edges

Will beautify and modernize any out-of-date Restaurant, Store-room, Hotel Lobby, Game-room, etc. Will sound-proof and insulate. Whether the home is old or new, Insulating Tile and Plank will make it more attractive. Has considerable Acoustical and Insulating value.

For new work install to the studs or ceiling joists, no plastering necessary as both Tile and Plank are Tongued and Grooved. For old work, install right over the old plaster.

Will change old-fashioned unattractive rooms into beautiful, modern, panelled, noiseless rooms at a very low cost.

ROCK WOOL INSULATION

Waterproof — Fireproof — Vermin Proof

LOOSE ROCK WOOL

No. 2457

Loose Rock Wool comes in a large, fluffy mass which is suitable for hand packing to the thickness desired. Can be used alone or with other types to insulate spaces where it is inconvenient to pour granulated or "pellet" type or use Rolls or Batts—such as stuffing irregular spaces around rafters or sidewalls. It is more economical but requires slightly more time to install.

55¢

Per 35 lb. Bag

\$31.50

Per Ton

GRANULATED ROCK WOOL

No. 2458

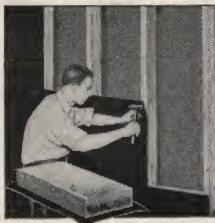

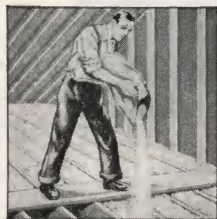

Granulated Rock Wool is the easiest form to install; just pour between wall studs, ceiling and floor joists, and level to desired thickness. It is especially suitable for the insulation of walls in old homes. The pellets are sufficiently large so as not to sift through wall or ceiling cracks. Contractors, with blowing equipment, use this type, which stops air circulation between walls and lessens fire hazard.

76¢

Per 35 lb. Bag

\$43.50

Per Ton

ROCK WOOL BATTS

No. 2455

Paper Backed — Carton Packed

These Batts have a strong, heavy paper which is cemented with asphalt to one side of the Rock Wool Batt. This moisture-proof paper overlaps four edges, the overlaps at sides to provide 1½" nailing flange to hold batt in place; the overlap at ends provide air-sealed joints between batts. Batts fit between wall and ceiling joists and attic rafters. Carton packed.

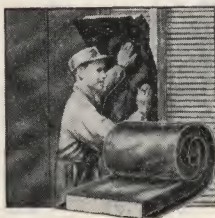

PRICED PER 1,000 SQUARE FEET

STEEL EXTERIOR LOUVRE

With Flange — For Air-tite Installation

Manufactured of 20 gauge steel, electrically welded and painted with two coats of high grade paint. Screen Wire is fastened to the inside of the louvre with screws.

Very easily installed, in frame construction, it is only necessary to cut an opening in the sheathing the correct size. Then nail the flange to the sheathing through holes provided and butt the siding up against the frame of the louvre. In brick construction the louvre is recessed 3", the flange fitting between mortar joints. No Wood trim is needed.

For Brick Wall or Brick Veneer Type Window Frames we recommend our Designs No. 251 or 252 illustrated on page 7.

ALWAYS ORDER BY OUR CATALOG NUMBERS

WINDOW FRAMES

Narrow Outside Casing — Western Pine — Draftproof

Ball-Bearing Jam-Proof Pulleys or Four Pullman Spring Balances

No. 251—Pulley Type
No. 252—Balance Type

Both types have Narrow Outside Casing $1\frac{1}{8} \times 2\frac{1}{4}$. Made draft-proof by the inner lining which extends behind casing to form a draftseal over weight box.

We especially recommend Frame No. 251 which is the pulley type, for low cost jobs where you desire or require the newer narrow exterior casing.

No. 251—Equipped with Four Ball-Bearing Jam-Proof Pulleys.

No. 252—Equipped with Four Strong Pullman Sash Balances.

Frames No. 251 and 252 can be used in any type of construction. When ordering, be sure to state whether required for Frame, Brick Veneer or Solid Masonry construction.

Priced per Frame with Ball-Bearing Pulleys or Pullman Spring Balances

No. 243 for 9" and 13" BRICK WALL—Sill $1\frac{5}{8} \times 7\frac{1}{4}$ ", Jamb $\frac{3}{4} \times 4\frac{1}{2}$ ", Outside Hanging Stile $1\frac{1}{8} \times 1\frac{5}{8}$ ", "Wind-Break" Head Blind Stop $\frac{3}{4} \times 4\frac{1}{2}$ ", Side Blind Stop $\frac{3}{4} \times 1\frac{5}{8}$ " and all necessary Enclosed Spring Balances, Tape Hooks and Spring Equalizers.

GLAZED WINDOWS INCLUDED

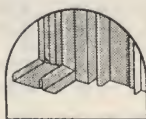

Units priced complete with Windows in Designs 2, 3, 6, 12 and 19 Manufactured of Clear Western Pine, Machined for Weatherstrip, Prefitted, Rot-Proofed and Glazed.

For illustrations showing Window Designs see Page 12

OVERHEAD SPRING BALANCES

For all Window Openings up to and including 30" glass width, two balances per Window are required and furnished, for openings over 30" glass width, four balances per Window are required and furnished.

WEATHERSTRIP

Full width and full length Metal Weatherstrip covers the entire Side Jamb and is formed with turned edges to properly space the opening between blind stop and top sash and between inside trim stop and bottom sash. This Metal Guide forms a complete and perfect track in which the Sash travels and is so formed that at no point is there any wood to wood contact. Head Jamb, Sill and both Check Rails are thoroughly weatherstripped.

Outside Door Frames and Casement Sash Frames to match above Units, use prices shown on Pages No. 10 and 11. When ordering, specify "NL" after the Frame Number.

The Popular Trim Designs No. 792, 797 and 799B appropriate for these Narrow Line Units, illustrated and priced on Pages 32 and 33.

GLAZED WINDOWS

Weather-Proof

CLEAR WESTERN PINE

Two Light 1 3/8" Check Rail

Our Windows are made with the **Special Putty Lock**, which locks the putty and absolutely prevents it from falling off. Before Glazing, this **Special Putty Lock** as well as the **Glass Trace** are primed with **Pure Linseed Oil** to make a perfect bond between putty and wood. Machine Sanded. Selected Flat Drawn Glass is used exclusively.

Note: Single Lights of Window designs 2, 3 and 6 are *Back Puttied*.

No. 2

No. 3

No. 6

No. 12

Windows of Glass widths of 18" or less are divided 2 Lights wide in Designs 3, 6 and 12. Glass widths 20" to 30" inclusive are divided 3 Lights wide. Glass widths over 30" are divided with increased proportionate number of lights.

Specifications for Above Doors

ROL-EASY DOORS are mortised, tenoned, waterproof glued and steel doweled. These doors are furnished in only one thickness (1 3/8"). The horizontal meeting rails are shiplap rabbeted, making a weather-tight joint. The sections are drilled for hardware, thus making installation much easier and more accurate. The doors are made to the net sizes as shown above and are sanded ready for painting. Complete step-by-step erection instructions are packed with the hardware.

HARDWARE includes all necessary screws, bolts, nuts, etc., for fastening hardware to the door and for anchoring tracks to the wood jambs. The vertical track is mounted on angle clips and reinforced with angle iron at the connection of the vertical and horizontal tracks. Chain used for lifting the door and necessary sheaves are furnished. Hinges are of formed steel. The lock-rods extend the full width of the door, and lock into the track. The lock is furnished with a tumbler cylinder. Locks can be keyed alike at no extra cost, if wanted be sure to state when ordering. Special oil-tempered extension springs are furnished and are easily adjusted so that the door will be properly counter-balanced and controlled at any position.

We would be glad to furnish Clear Glass and Glaze the top sections of above Doors — if desired, add \$2.95 to the Single Car Sizes or \$5.15 to the Two Car Sizes.

OVERHEAD TYPE SECTIONAL GARAGE DOORS

Two Direct Action Springs—Four Sections—
Rot-Proofed—Complete With All Hardware

Due to restrictions at the present time on materials used in manufacturing Overhead Doors it is necessary that all orders for Overhead Doors be accompanied with a priority extension of AA2X or better. This restriction may be lifted—contact us when you are in need of Overhead Doors.

No. 399—Door Partly Open

HARDWARE has been especially designed for overhead doors, thus simplifying parts. Hinges are eight inches long, of formed steel, and are fastened to the door by bolts. All door rollers are ball-bearing, as are the sheaves over which the lifting chain passes.

All necessary screws, bolts and nuts, etc., are furnished. Doors may be locked on the inside or on the outside by turning the lock handle. They are automatically unlocked from the outside by a key. The locking device is provided with a tumbler cylinder, and with lock rods engaging the tracks on each side. Doors can be keyed alike at no extra charge and when required be sure to so state on your order. All hardware has rust-resisting black japan finish.

Complete installation instructions included with each set. No previous experience necessary, any carpenter can erect in approximately the same time it takes for any ordinary set of Garage Doors.

No. 399 — STANDARD STOCK SIZES — No. 399

Opens Easier

Closes Tighter

Unless ordered otherwise, the Third Section from Bottom will be open for glass. Wood Panels in all Sections or any arrangement of Glass Openings can be furnished at no extra cost. If wanted, be sure to specify when ordering.

Priced per complete opening including Doors, all Hardware and Cylinder Lock.

OVERHEAD TYPE SECTIONAL GARAGE DOORS

Direct Action Springs—Rot-Proofed
Complete With All Hardware

CONVENIENTLY opens "overhead and out of the way." Just a slight upward lift, and your ROL-EASY rolls on its way to an overhead position. An easy pull and it glides smoothly and quietly, without effort, to its closed position.

EASY TO OPEN AND CLOSE is a term frequently used by women and children who operate ROL-EASY Doors. Carefully selected counter-balance springs keep the doors in perfect balance at all positions. No tugging and pulling of dead weight required. Full ball-bearing track rollers, plus power from the springs keep ROL-EASY Doors alive and in perfect operating condition.

No. 399 — SPECIAL SIZES — No. 399

1 3/4" Thick — Made Promptly to Exact Size — 12 1/2" Headroom

These special size doors are accurately made to the same rigid specifications as shown on the preceding page for stock doors. At least 12 1/2" Headroom is required. Doors over 144 square feet should have 18" of headroom to permit the use of 20" radius struts. All doors 12'1" to 14'0" wide are provided with three U-shaped steel reinforcing struts. Doors over 14'1" wide have a strut for each section and one extra for the bottom section. The struts prevent sag of the sections when they are in the horizontal position. Struts are included in the prices listed below.

Can be furnished with one or more Sections open for Glass or all Wood Panels as you prefer, give design when ordering. Also important you state kind of Glass that will be used, as this information is needed so we can furnish springs of correct tension.

Priced per complete opening including Doors, all necessary Hardware and Lock, made to the exact size of the opening.

SPECIAL NOTICE

Sash Trim Same Price as Corresponding Window Opening—When ordering please specify whether Sash Swing IN or OUT.

Smaller Sizes take price of next larger size. Larger sizes in proportion.

R. E. Window Stop No. 757, $\frac{3}{8} \times 1\frac{3}{8}$ can be furnished at no additional cost when so specified on your order.

If Stool No. 764, $1\frac{1}{8} \times 3\frac{1}{2}$, substituted, add to price of any set of Trim as follows:
Western Pine \$0.20 — Gum \$0.31

When Brick Veneered Wall Window Frames or Furred Solid Brick Wall Window Frames require stops and stools, one inch wider than above, so specify after style of trim and add 16% to above window trim prices.

Trim for 13" Brick Wall Window Frames require Stools 4" wider (No. 766) as well as Extension Jamb No. 731, $\frac{3}{4} \times 4\frac{3}{4}$. When ordering specify 13" BW after Style of Trim and double the above Window Trim prices.

Mullions, Triples, Quadruples or Quintuples take 2, 3, 4 or 5 times Single Set Prices. Half Circle, Tudor or other Shaped Heads, Five Times the Prices shown above.

We can manufacture Trim, Mouldings and Frames of any size and design in Oak, Red Gum, Birch, Walnut, etc. Please let us have your list and details of your needs.

During the present emergency we are doing our best to fill all orders. If at times we are a little slow or out of stock of certain items, would appreciate if you would bear with us and accept substitute items when the exact item you desire is not available. We will not at any time make a substitution without first securing your permission. Our available stock is changing constantly and items that we do not list can be supplied from time to time and we suggest you send to us an exact list of your requirements and we will be glad to tell you definitely what we can furnish.

DISAPPEARING STAIRWAYS

Our Quality

SPRING BALANCED STAIR

Hand Rail Included with Each Stair

SMOOTH OPERATION — Stair slides through ceiling on rollers attached to ceiling door. Weight is counter-balanced by two long coil springs—sliding action is controlled by a friction brake, which insures smooth operation. Stair cannot slide down accidentally.

Requires smaller ceiling opening permitting the installation in closets and similar places where it will be entirely concealed.

SPECIFICATIONS: Complete stairway includes 1 1/8" ceiling door with Western Pine Stiles and Rails, Birch Panel. Yellow Pine Stringers housed to receive Western Pine Treads and Rigid Handrail is included. Stair is Stained a serviceable brown. Ceiling door not stained as this is usually painted to match ceiling. No jambs or trim included. Complete Hardware including brackets, coil springs, hinges, screws, etc., furnished. All black japanned.

Each Set is shipped K.D. in dust-proof cartons. Complete instructions for installing included with each set.

MODERN NOOK OR RESTAURANT SET

Clear Western Pine

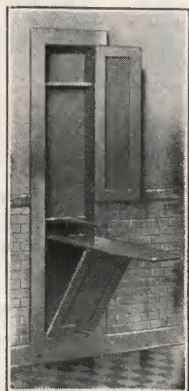

Set No. 950

Specifications

This Set is very sturdily built, all parts accurately machined of Clear Western Pine. The unusually low price of this attractive Set made possible through large quantity production. All angle irons, screws, table braces, etc., are included. Shipped semi-assembled and packed in dust-proof cartons.

Set No. 950 requires a floor space 64" wide x 54" deep. Table is 26" wide x 48" deep x 30" high. Two Seats furnished, each is 18" deep x 54" long x 36" high. The exposed Seat Ends and Table Ends are ornamented with a shallow, decorative groove. This groove easily painted with some contrasting color will insure a most attractive ensemble.

Door Co., Cincinnati, Ohio

FINISHED MODEL ART WOOD CABINETS

Completely Assembled — Ready to Set in Place
Finished Lustrous White or Attractive Cream

**Standard Units So Flexible and Complete That They Will Fit
Any Kitchen Arrangement**

This system of interchangeable units can be adapted to any size or shape Kitchen due to the large variety of widths, heights and types.

Finished

The Units are furnished Completely Finished in "Lustrous White" or "Attractive Cream" Enamel. We can also furnish Off-White or Light Cream at no additional cost, when so specified. Each Unit is given Three Coats, the Top Enamel Coat is of Synthetic Enamel and is especially resistant

to abrasion wear and retains its color. Can also be furnished Unpainted.

Installation of Units

This is a very easy matter as the Units come completely set up, with all Hardware applied. Units should be screwed to the wall to give you a tight and substantial finished arrangement. "Ceiling Height" Installations can be easily made by a combination of two Wall Cabinets with joint concealed with our neat Joint Mould No. 7475.

Specifications

Construction is extra heavy and trouble proof. Wall Cabinet Ends are 5 Ply Veneer so that warping, checking and splitting is impossible. Shelves of all Wall Cabinets are tenoned into the ends. There is a Mullion Bar between all doors so that both Wall and Base Cabinets are perfectly rigid and cannot be sprung due to an uneven wall. Drawers have center Guides with a Tilt Guide so the Drawers do not drop when extended from the Unit. All Doors are 5 Ply Flush type and Front Frames are doweled and glued together. Bottom Units have Toe Space which enables you to stand up close to the Cabinet without kicking or scuffing the bottom of the Cabinet. Wall Cabinets 18" high have one Shelf and Wall Cabinets 30" high have two Shelves.

DELUXE FEATURES HARDWARE

Pull

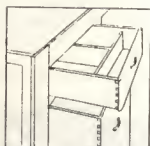

The Hinges are semi-concealed of heavy gauge. The Pulls are Beautifully Designed as illustrated. This Hardware will not rust. We can furnish Red, Black or Blue Bakelite Pulls at no extra cost; if wanted be sure to so state when ordering.

Hinge

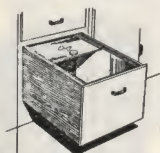

DRAWERS

Drawers are all Hardwood with bottoms of Three Ply Panels. Dovetailed Construction used throughout which insures that the drawers will stand up under hard usage. Top Drawers of all Base Units are partitioned for Cutlery.

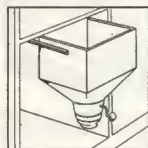

METAL PASTRY OR FLOUR DRAWER

Is standard equipment and furnished in all Base Units containing Double Height Drawers without extra cost. Ideal for Bread or Pastries or for storing flour.

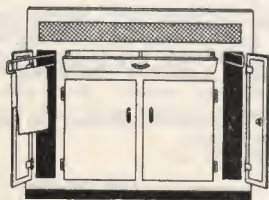

FLOUR BIN AND SIFTER

For use in Top Sections and can be furnished as an extra, holds 24 lbs. in the Cabinet and is entirely concealed by the door when not in use. When wanted be sure to mark plainly the Upper Unit in which this Flour Bin and Sifter is to be installed.

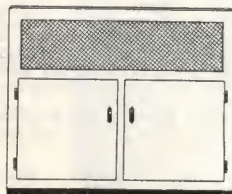

SINK FRONTS

Deluxe Sink Fronts have Tilting Soap and Brush Container and two side Doors each containing Sliding Towel Racks. Sizes up to 33" wide inclusive have two Towel Racks and sizes 36" and wider have four Towel Racks. Also has large Center Storage Compartment and Grille for Ventilation.

Deluxe

Standard

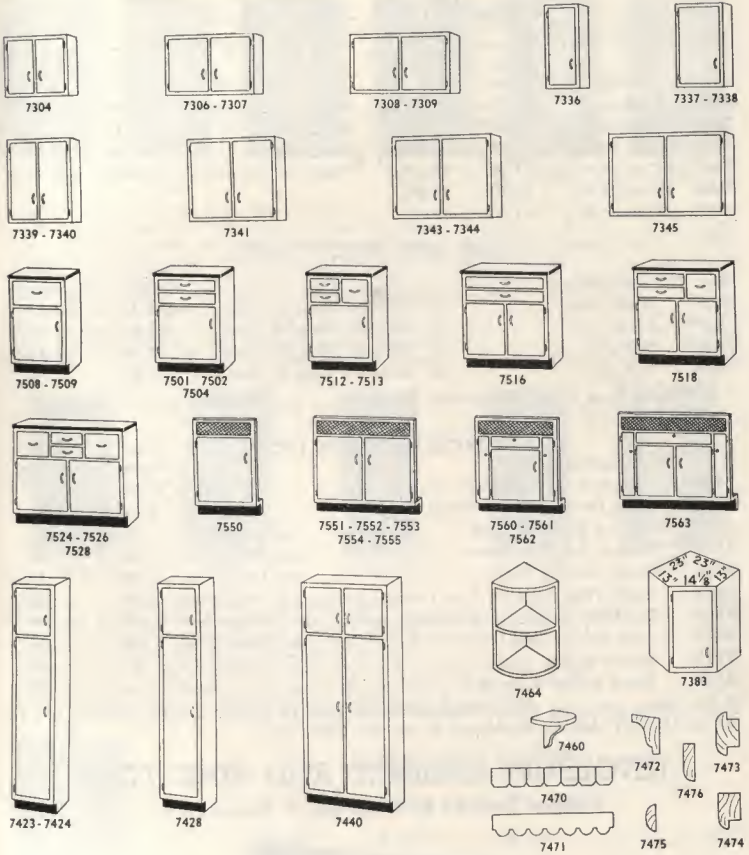

Standard Sink Fronts have a large storage space and Grille for Ventilation.

LINOLEUM CABINET AND SINK TOPS

Custom Built to Fit Your Exact Requirement

To give the kitchen that final touch, be sure to use one of our CONTINUOUS CABINET OR SINK TOPS. Nothing could be more attractive than a Modern Kitchen built up with our completely Assembled and Finished Model Art Wood Cabinets and as a final touch, use one of these modern, efficient CONTINUOUS TOPS. When ordering, be sure to furnish a plan showing the layout of your kitchen with all exact dimensions.

Constructed of ⅛" Battleship Armstrong Linoleum cemented to 1¼" 10 Ply wood base completely water-proofed. Edges banded with Moulding installed with concealed fasteners with top face carefully mitred and smoothly soldered at the corners. Great care is taken to make all points, where metal comes in contact with wood or linoleum and all joints, positively water-tight. Underside of top is finished with an application of water-proof lacquer. Entire Construction positively guaranteed WATER-PROOF and WATER-TIGHT. Tops furnished in BLACK, BLACK MARBELLE, BLUE MARBELLE or RED MARBELLE, your option. Be sure to state which color you wish when ordering.

Priced per Cabinet Top or Sink Top

Catalog No.	Description	Sizes Up to and Including					Add for Each 6"

INSULATED BRIC-SIDING

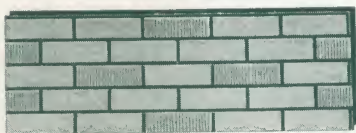

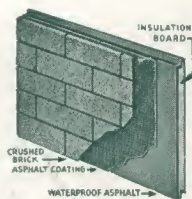

For Old or New Homes — Never Requires Painting

Insulated Bric Siding has a backing of $\frac{1}{2}$ " Insulating Board shiplapped on all four edges and covered with a special waterproof asphalt. The exterior surface is then covered with a special Asphalt Coating Compound into which crushed brick is firmly embedded. It is permanent in color. Colors are fast — unaffected by sun, rain, ice or snow.

Real Brick appearance at a fraction of its cost is one of the big features of this Siding and the fact that it never requires painting and reduces your fuel cost due to its insulating value means that it will pay for itself within a very short time.

Ideal for Modernizing old buildings at low expense as it can be solidly nailed right over the old siding or shingles.

1492

1495

1493

1496

EASY TO HANDLE

Insulated Bric Siding is furnished in small panels which are very easily handled. It can be cut with a hand saw and its shiplapped edges form an absolutely air-tight surface. We suggest using Caulking Compound around Door and Window Frames to prevent any possibility of air leakage.

Comes in four colors: RED, BUFF, TAPESTRY and RED BLEND, all with Black Mortar Lines. When ordering, be sure to state which color you prefer.

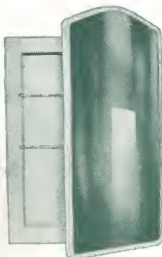

\$10.68 Per Square

No.	Kind	Size	Cartons Per Square	Pcs. Per Carton	Price Per Carton

BATHROOM CABINETS

QUALITY — NEW — DISTINCTIVE

The cabinet body of these models is made of kiln dried hardwood, with joints double locked, glued and tenoned; door-back of moisture-proof composition board; mirrors of double-strength quality; finish, three coats baked-on, white enamel. A feature of the cabinet especially emphasized, is the neat mirror frame of steel (by permission of WPB), finished to match the cabinet. Equipment consists of two glass shelves; bar-type door stop; stainless steel door strike and bullet door catch.
